ID	Title	Story Points	Priority	Status	Assigned To
US01	Set up Git repo and project structure	1	High	Done	Yousefi
US02	Install MariaDB and connect it to Node.js server	2	Low	Done	Khedri
US03	Design initial article schemas	5	High	Done	Maghsodi
US04	Create route to fetch all articles	3	Medium	Done	Khedri
US05	Scrape Digiato articles and store in MariaDB	5	High	Done	Maghsodi
US06	Build tag selection UI page	5	High	Done	Yousefi
US07	Scrape TechCrunch and store new articles	5	High	Done	Maghsodi
US08	Add tag and category fields to articles	5	High	Done	Khedri
US09	Create /tags API to list all tags	2	High	Done	Khedri
US10	Create article filter API by tag	2	High	Done	Khedri
US11	Connect tag selection page to API	3	High	Done	Khedri
US12	Update article schema	3	High	Done	Maghsodi
US13	Scrape Zoomit and store articles in MariaDB	5	High	Done	Maghsodi
US14	Add cron job for auto-scraping	8	Low	Blocked	Khedri
US15	Sort articles by date in API output	2	High	Done	Khedri
US16	Add logging and error handling in APIs	3	Medium	Done	Khedri
US17	Build article list page by selected tags	3	Medium	Done	Yousefi
US18	Track user behavior (clicks and tags)	5	Medium	Done	Khedri
US19	Scrape Dev.to articles and store in DB	5	High	Done	Maghsodi
US20	Prepare topic structure for tag management	5	High	Done	Maghsodi
US21	Enable article click-through to source	3	High	Done	Khedri
US22	Create questionnaire for user reviews	3	High	Done	Yousefi
US23	Draft business plan	5	High	Done	Yousefi
US24	Back up current data for test	3	High	Done	Maghsodi
US25	Backup initial data and test backend-frontend sync	5	High	Done	Maghsodi
US26	Prepare initial Pitch Deck document	3	High	Done	Yousefi
US27	Test full MVP functionality on local server	3	High	Done	All people
US28	Fix bugs and resolve reported issues	5	High	Done	All people
US29	Add review questionnaire form and test it	1	High	Done	Yousefi
US30	Backup final MVP data	3	High	Done	Maghsodi
US31	Buy server and deploy site for testing	3	High	Done	Sadeghi
US32	Final review and full MVP test for demo	2	High	Done	All people
US33	Share product and collect feedback from real users (50)	3	High	Done	Yousefi
US34	Finalize Pitch Deck, Financial Projection, and Traction docs	5	High	Done	Yousefi
US35	Package files for investor presentation (video + docs)	5	High	Done	Yousefi
US36	Create two-step topic selection UI (dev → news)	1	High	Done	Yousefi
US37	Develop API to fetch topics by type	2	High	Done	Sadeghi
US38	Add Persian summary to Dev posts	8	High	Done	Maghsodi
US39	Review data structure to support type field (dev/news)	5	High	Done	Maghsodi
US40	Build filter API by post type and topic	2	High	Done	Sadeghi
US41	Scrape FreeCodeCamp News or StackOverflow Blog	3	High	Done	Maghsodi
US42	Design dual tabs (dev/news) on post display page	3	High	Done	Yousefi
US43	Create article filter API by tag and type	3	High	Done	Sadeghi
US44	Sort articles by date in API output	2	High	Done	Sadeghi
US45	Add logging and error handling in APIs	3	Medium	Done	Sadeghi
US46	Track user behavior (clicks and tags)	5	Medium	Done	Sadeghi
US47	Enable article click-through to source	3	High	Done	Sadeghi
US48	implement dual tabs (dev/news) on post display page	3	High	Done	Sadeghi
US49	Planning Seo for MVP	3	High	Done	Yousefi
US50	Clean Scrape code	3	High	Done	Maghsodi
US51	Backup Final Data	3	High	Done	Maghsodi
US52	Check scrape code for sources	3	High	Done	Maghsodi
US53	Make landing page	5	High	Done	Yousefi
US54	set up linkedin page	3	High	Done	Yousefi
